

TST-329 Surface Mount Masking Transducer

- Designed for extreme / outdoor environments where normal speakers cannot go
- Can be used in outdoor environments
- 3M adhesive disc for secure and fast placement
- Exciter is sealed in an IP67 rated watertight enclosure
- NXT Technology ensures good sound quality

Our TST-329 is a valuable security product that can be used on any flat surface. Including windows, doors, walls, and ducts. The subtle design incorporates two-part transducer / transformer provides discrete placement and mounting options.

The TST-329 requires a sound masking generator and 70.7V amplifier for operation.
