

**Model No.**

LLR-2118-B

Laminated Rack**• 21U x 18"D x 20.41"W**

The LLR Series rack is a sturdy wood composite with a Cathedral Black woodgrain laminate finish. This laminate rack provides a simple, cost-effective method of installing 19"W electronics in venues requiring a premium, furniture grade appearance.

Construction & Features

- Sturdy 5/8" wood composite with Cathedral Black woodgrain laminate finish
- Easy assembly with Phillips-head cams and dowels
- No visible hardware. Assembly hardware (cams/dowels) installs from the inside and includes black caps to conceal it. Requires Philips-head screwdriver (not included).
- Includes one pair of 11-gauge steel, fixed-position mounting rails installed in front panel space. Rails are printed with rack unit increments to aid equipment installation.
- Load capacity 200 lbs.
- Useable depth 17.5"
- Made in the USA
- Ships unassembled

**A&E Specifications**

The laminated rack shall be AVLELEC Model No. LLR-2118-B which shall measure 20.41"W x 18"D x 38.15"H and provide 21 rack units of panel space. The rack shall be constructed of a 5/8" wood composite with a Cathedral Black woodgrain laminate finish. It shall include one pair of 11-gauge steel mounting rails installed in front, which shall be printed rack unit increments. The rack shall ship unassembled and include cam and dowel assembly hardware. Hardware shall install from the inside and include black cover caps for a "hardware free" appearance.

Optional (order separately)

- LLR-RRT-21: One pair rear rack rails (21U)

All measurements are inches.
